

Nutsetters

Lobular Design

IRWIN® Impact Performance Series™ lobular nutsetters are built for maximum durability, performance, and long life with impact tools. They are designed to drive the fastener from the side, rather than forcing the corners to turn, maintaining the true shape of the fastener and dramatically reducing breakage and damage from stripping. The lobular design also provides more clearance on the corners of the fastener where paint build-up often occurs. They are available with or without powerful rare earth magnets that hold fasteners securely in place. They have a black oxide finish that resists corrosion and increases the life of the nutsetter. Plus, with a 1/4" quick-change shank, they're designed to work with all types of impact and rotary drivers.

Impact Nutsetters - Lobular

FASTENER DRIVE

Impact Bit Holders

1837579

- C-ring design has internal clip that fits into the retaining ring notch of the insert bit to hold bit securely in place.
- Rare earth magnet holds fastener securely. Magnet is four times more powerful than standard magnets.
