IRWIN® Folding Utility Knives with BladeLock Technology: Keeps Blade Locked In

The next generation of IRWIN Folding Utility Knives with patented BladeLock Technology are engineered to keep the utility blade securely locked in the knife handle. The proprietary design addresses the most frequently cited user frustration – when blades accidentally pull out of the handle during use. BladeLock Technology further improves safety by providing the user with the ability to change blades only when the release button is engaged and the blade holder is in the 45° open position. No other folding knife offers this level of blade security and user safety.

Whether you need the compact durability of the FK100, the built-in blade storage of the FK150 or the versatility of the FK250 with fold out screwdriver, IRWIN is the new standard in folding utility knives.

BladeLock Instructions

Press button to insert
or release blade
